

Abraxas power corp Dominican Republic

Is the World Bank financing the Dominican Republic power sector reforms?

The World Bank is also financing the Second Generation Power Sector Reforms of the Dominican Republic Power Sector Program through US\$150 million of financing in the period 2005-2008.

What is Energas & AES doing in the Dominican Republic?

Energas and AES shared a commitment to transitioning the Dominican Republic away from conventional generation and toward a greener energy mix through natural gas.

Does the Dominican Republic need a natural gas infrastructure solution?

However, the Eastern region of the country where Energas' facility is located lacked existing natural gas networks or pipelines to transport natural gas. The Dominican Republic needed a holistic infrastructure solution to strategically shift from conventional generation to natural gas.

How many distribution companies are there in the Dominican Republic?

In the Dominican Republic, there are three distribution companies. The government owns two of them, EdeNorte and EdeSur, through the CDEEE (50%) and the Fondo Patrimonial de las Empresas (FONPER).

The new SIBA Energy natural gas-fired power plant in the Dominican Republic features 12 Titan model turbines. It will have 280 MW of generation capacity when operating in combined cycle configuration.

About Abraxas Power Corp. Abraxas Power is an energy transition developer focused on decarbonizing hard-to-abate sectors and creating value by solving the current and future challenges of the ...

A CSR corporation is environmentally, economically and ethically responsible. Abraxas' focus is to decarbonize hard-to-abate, polluting industrial sectors and lower CO2 emissions with minimal environmental impact. Ongoing bird, bat, wildlife, flora and benthic surveys are only one facet of our environmental considerations.

Renewable energy resources
Tariffs and subsidies
Prior to the 1990s reform, the Dominican power sector was in the hands of the state-owned, vertically-integrated Corporación Dominicana de Electricidad (CDE). The operation of the company was characterized by large energy losses, poor bill collection and deficient operation and maintenance. During the 1990s, the rapid
