

Alternate energy solutions Kenya

Who are the partners of solar energy in Kenya?

The company has giant partners like Kenya Power, Energy Regulatory Commission, Rural Electricity Authority, as well as the Republic of Kenya. The company's main goal is to provide homes and businesses in Kenya with renewable energy solutions and quality solar energy systems.

Will solar power be the cheapest form of power in Kenya?

While the graphs 7 and 8 give an overview with current costs of technologies, forecasts are that solar power will reduce at least 25% in investment costs over the coming 20 years while other technology costs will reduce maybe 10%. This is likely to make solar power the cheapest form of power in Kenya.

Which company is generating geothermal energy in Kenya?

The Kenya Power and Lighting Company powered the initiation and Kenya Electricity Generating Company took it. Right now, the Geothermal Development Company looks as well as carries out all the work regarding the exploration of geothermal sources. It is estimated that Kenya has the potential of generating almost 10 GW of geothermal energy.

Why do you need a solar company in Kenya?

They ensure their customers receive high-quality solar products as well as the necessary support needed. The company has giant partners like Kenya Power, Energy Regulatory Commission, Rural Electricity Authority, as well as the Republic of Kenya.

What are some alternatives to fossil fuels in East Africa?

Some other solutions are not included, as wood briquettes (that are not well known in East Africa), LPG gas (that perpetuate the reliance in fossil fuels and are hard to afford for most of the population), and ethanol (that has low energy efficiency in production). High-efficient cook stoves for wood and charcoal with efficiencies of 50%.

What are the decentralized power options in Kenya?

Among the decentralized power options, decentralized renewable energy options such as mini-hydro, PV stand-alone and mini-grid systems with the option of complementing with wind turbines, and clean technologies will enhance the access. The model output is placed side by side with Kenya's national Rural Electrification Master (REM) Plan.

We focus on providing clients with alternative energy to the national grid to ensure dependability and reliability.
