Rail was introduced in Sri Lanka in 1864 to transport coffee from plantations in the hill country district of Kandy to the port city of Colombo on its way to Europe and the world market. The coffee blight of 1871 destroyed many a fine plantation and tea replaced coffee. With the development of tea plantations in the 1880s, the joint-stock ...

More Info on Solar Micro Inverters How Do Micro Inverters Work? An inverter is an essential component of any solar energy system, converting direct current (DC) electricity from the solar panels into alternating current (AC) electricity used for your home's appliances. Traditionally, solar systems have utilized a single centralized "string" inverter.

"In Sri Lanka post-harvest losses are significant, affecting 20% - 30% of vegetables and 15% - 20% of fruits.

Inadequate packaging has been identified as a major cause of these losses," the EDB said in a statement. The trade body recently conducted an awareness session focusing the packaging solutions for fruits and vegetable sector.
