

Who is Akuo Energy?

France-based Akuo Energy will be involved in the deployment of ocean thermal energy (OTEC) and hydrogen and battery storage capacity in Bora Bora, French Polynesia. The French renewable power producers said on Monday it will take part in a project aiming to decarbonise the electricity production and transport sectors on the islands.

Does French Polynesia rely on hydrocarbons?

French Polynesia, like most island territories, is highly dependent on hydrocarbon imports. In 2019, 93.8% of energy consumed in the archipelagos came from imports of various petroleum-based fuels. The renewable energy penetration rate in power generation stood at 28.78% in 2019. This figure has remained stable over the last five years.

How much electricity does French Polynesia use?

Hydroelectricity accounts for 23% of the electricity mix in French Polynesia. It is the first renewable energy source in French Polynesia with an installed capacity of 49.3 MW. Solar water heaters produce hot water using solar energy. In 2019, the electricity consumption saved is approximately 22 GWh, i.e. 3% of electricity consumption.

What is French Polynesia's energy transition plan?

French Polynesia's energy transition plan has three main objectives: Change the energy model, by gradually replacing the use of fossil fuels with renewable energies in all activities

Can a SWAC reduce fluorinated gas emissions in French Polynesia?

It will be interesting to test this hypothesis with the SWAC operating in the general hospital of French Polynesia. The SWAC technology has the benefit to not emit any fluorinated gas which has a significant environmental impact.

Is biomass a source of electricity in French Polynesia?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. French Polynesia: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.
