

Armenia freyr battery gigafactory

Does Freyr battery have a Giga America plant?

Freyr Battery has begun construction of its 'Giga Arctic' factory in Norway, which is the template for its planned 'Giga America' plant in Georgia. European lithium-ion battery upstart Freyr Battery is deepening its transatlantic ties, lured to the US by lucrative incentives that have unleashed a clean energy manufacturing renaissance.

Where are Freyr batteries made?

FREYR has commenced building the first of its planned factories in Mo i Rana, Norway and announced potential development of industrial scale battery cell production in Vaasa, Finland, and the United States.

Can Freyr battery be financed by Eksfin?

FREYR Battery's factory can play a key role in building a powerful, high-tech value chain within batteries in Norway and the Nordic countries. Eksfin has therefore indicated participation in the financing of the project in collaboration with other financiers and investors.

The gigafactory will have a 29 GWh capacity, supported by \$1.6 billion in debt financing. Construction is sanctioned with production starting in 1H-2024. The project includes eight production lines and a battery testing center. FREYR aims to reach over 200 GWh annual production capacity by 2030.

FREYR (NYSE: FREY) is a clean energy solutions provider building an integrated U.S. supply-chain for solar and batteries. In November 2024, FREYR announced a transformative transaction, positioning the Company as to be one of the leading solar manufacturing companies in the U.S., with a complementary solar and battery storage strategy.
