

Where does Armenia get its energy from?

Lacking indigenous resources, Armenia imports natural gas and oil for most of its energy needs (78.6% of total energy supply in 2020), mainly from the Russian Federation (hereafter, "Russia").

Why does Armenia need a single energy supplier?

Armenia relies on imports of natural gas and oil for most of its energy needs, which exposes it to supply risks and dependence on a single supplier. As the government considers energy security and the development of indigenous sources to be of prime importance for the energy sector, renewables and efficiency measures are key areas.

How much energy does Armenia need?

It has been an observer to the Energy Community since 2011 and a member of the Eastern Partnership since 2009. Although Armenia's energy demand averages more than 3 Mtoe (3.59 Mtoe in 2020) and the country does not produce any fossil fuels, it manages to cover 27% of energy demand with domestic energy production.

How much energy does Armenia produce in 2021?

In 2021, Armenia produced 7.7 TWh of electricity, of which natural gas covered 44% (3.4 TWh), hydro and other renewables 30% (2.3 TWh) and nuclear 26% (2.0 TWh). In the Caucasus region, Armenia is the only country producing nuclear energy. Armenia's energy demand averages more than 3 Mtoe (3.59 Mtoe in 2020).

Does Armenia use natural gas?

Natural gas represents a large portion of total energy consumption in Armenia, accounting for 50% and is the primary means of winter heating in the country.

What is a small HPP in Armenia?

Constructing small HPPs is Armenia's favoured course of action to develop the renewable energy sector and secure energy independence. Most designated, under-construction or operational small HPPs are derivational stations on natural water flows.

An Energy Action Plan (EAP) focuses on reducing energy consumption by specific percentages or amounts. An EAP can be part of a complete CAP or function as a standalone plan. It generally involves a Level 2 energy audit, and takes it a step further by offering targeted strategies and projects to meet reduction goals.

Integrated Energy Resource Plan

Armenia: Energy intensity: how much energy does it use per unit of GDP? [Click to open interactive version.](#) Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

Armenia hyperion energy

HYPERION ENERGY GROUP, LLC is a Louisiana Limited-Liability Company (Non-) filed on March 4, 2011. The company's filing status is listed as Inactive - Action By Secretary Of State and its File Number is 40448664Q. The Registered Agent on file for this company is Incorp Services, Inc. and is located at 3867 Plaza Tower Dr., 1st Floor, Baton ...

Armenia's energy sector has been significantly shaped by its geographical and geopolitical circumstances. With no significant fossil fuel reserves, the country heavily relies on energy imports, which account for 78% of its primary energy ...

Find company research, competitor information, contact details & financial data for Hyperion Energy LP of Dallas, TX. Get the latest business insights from Dun & Bradstreet.

At the forefront of the energy transition ... Hyperion was founded in 2006 and has been a leading solar greenfield developer in Iberia with an innovative mindset and growth focus. Since 2021, Hyperion has committed to become a reference IPP with currently over 170 MW under construction in Portugal.
