

Armenia sabson energy

How does Armenia generate electricity?

Most of the rest of Armenia's electricity is generated by the natural gas-fired thermal power plants in Yerevan (completed in 2010) and Hrazdan. Upon gaining independence, Armenia signed the European Energy Charter in December 1991, the charter is now known as the Energy Charter Treaty which promotes integration of global energy markets.

What is the Sabson group?

The SABSON group is a diversified business group from Hadramout region, Middle East. The group was started more than 100 years ago in Hadramout and now operating in Yemen, Oman, UAE, Saudi Arabia, Jordan, Bahrain, Europe, Eastern Asia and Africa.

Does Armenia have a surplus electricity sector?

The Armenian electrical energy sector has had a surplus capacity ever since emerging from a severe post-Soviet crisis in the mid-1990s, thanks to the reopening of the Metsamor Nuclear Power Plant, which was built in 1979 and supplies over 40% of the country's electricity.

Does Armenia use natural gas?

Natural gas represents a large portion of total energy consumption in Armenia, accounting for 50% and is the primary means of winter heating in the country.

What are the main energy sources in Armenia?

Since 1996 three main energy sources for electricity generation in Armenia were natural gas, nuclear power and hydropower. Despite a lack of fossil fuel, Armenia has significant domestic electricity generation resources.
