A battery backup system and the electrical grid can both be used with a hybrid solar system. For households that desire backup power in case of an outage or load shedding, this kind of system is perfect. With a battery backup system, a hybrid solar system allows for the storage of extra energy generated by the solar panels.

You may want a solar system that can supply all the electricity you require on an annual basis. A 1kWp solar power plant typically produces 90 to 120 units of electricity per month. Therefore, to get an approximate idea of the capacity of a solar power plant needed in your home, divide the consumed units on your electricity bills by 90 or 120.
