What can beta energies do for You?

Let's Create a Cleaner, More Sustainable Planet for Everyone. Beta Energies is here to help you find the best smart energy solutions for your commercial or residential space. Complete Commercial & Residential Energy Solutions. We Spearhead the Much Needed Transformation to Create Clean, Affordable Energy for Everyone.

Why is energy important in Brunei Darussalam?

As Brunei Darussalam is blessed with substantial reserves of oil and gas, the energy sector plays a pivotal role in the country's economic prosperity. The Department of Energy at the Prime Minister's Office contributes to the energy sector development including oil and gas, power sector and renewable energy.

Can Brunei transition to green energy?

Brunei's transition towards green energy requires not only a whole-of-nation approach, but also regional collaboration as the country aims to advance its national solar energy target to 200 megawatts by 2025, with solar power making up at least 30 per cent of the overall power generation mix by 2035.

How much energy does Brunei need?

In 2005, Brunei's total energy needs was 2,435 KTOE. As of 2022, approximately 127,000 barrels of oil and 243,000 barrels of natural gas equivalent are produced daily by Brunei's oil and gas fields. A refinery used for the oil field in Seria. In 2005, oil supplied 24.4% of Brunei's total energy needs.

What is the Brunei energy industry integrity pact (beiip)?

Established in 2017, the Brunei Energy Industry Integrity Pact (BEIIP) represents the energy industry's commitment in upholding business integrity and fight against any form of corruption. This is delivered through 10 essential principles which the signatory companies shall incorporate into their ways of working.

Will Brunei generate 100 mw of solar energy by 2025?

Brunei has set a target of generating 100 MW of solar energy by 2025 as part of the government's initiative to slash greenhouse gas emissions by 20 percent over the next 10 years. With the vast majority of the country's electricity generated by gas-powered plants, Brunei has one of the highest annual carbon footprint per person in the region.
