

What is Botswana's energy mix?

Botswana's energy mix consists of three primary energy sources - the Morupule A & B coal-fired plants, which, based on their capacity factors, have a 360 MW capacity, the Orapa (90 MW) and Matshelegabedi (70 MW) diesel plants, and 150 MW imports (BPC 2020) (Fig. 3). No information was provided by the author.

How is energy used in Botswana?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

How much energy will Botswana have by 2040?

In line with the IRP model results, the Government of Botswana has approved and intends to implement energy projects with a total installed capacity of 1 540 MW by the year 2040 to meet the growing energy demand at least cost whilst also reducing the country's carbon footprint.

What is integrated energy planning in Botswana?

Integrated Energy Planning and developing an Integrated Resource Plan (IRP) are an integral part of the energy planning process in Botswana as guided by its 11th National Development Plans (NDP 11) and other sector policies and ambitions. In the energy sector, the NDP 11 focuses on increasing self-reliance on the country's energy resources.

What is Botswana's energy policy?

Botswana's energy policy is anchored on three key aspects - increasing access to electricity through the Rural Electrification Project, security, and stabilization of the power supply, and onboarding Independent Power Producers, especially within the Solar PV sector (BPC 2020).

Does Botswana use bioenergy?

Source: Global Atlas (2021). Botswana is endowed with a range of bioenergy resources which could be used for energy production. Wood fuel remains the dominant cooking fuel for rural households, as 42% of the population relies on it (IEA, 2016). In 2009, a usage rate of 53% in rural and 13.1% in urban households was reported (SEforALL, 2012).

Sedgeley Energy is an experienced provider of customised solar photovoltaic and solar-battery hybrid solutions. SolarSaver was established in 2016 as a vehicle through which Sedgeley Energy and its investment partners could offer financing and long-term rental options for the installation of these systems to corporate and commercial clients throughout Southern Africa.

Kibo Mining has announced an agreement to acquire an 85% interest in the Mabesekwa coal to power project in Botswana from Sechaba Natural Resources, a 100% subsidiary of Shumba Energy. In a 30 November press
