

# Bright renewables b v Indonesia

Who is bright renewables?

Bright Renewables is a technology leader of in-house membrane biogas upgrading systems, CO<sub>2</sub> liquefaction systems, carbon capture, and bio-LNG.

Who makes Bright renewables biogas upgrading systems?

We are excited to continue our strong collaboration with Martin Construction Resource and Martin Energy Groupin delivering high-quality,high-efficiency biogas upgrading systems. Since 2019,Martin Energy Group has been manufacturing Bright Renewables systems at their Tipton,MO facility,with over 20 systems now operational across the country.

Are bright Renewables a good company?

"Throughout our time working with Bright Renewables we have been consistently impressed at the levels of diligence,competence and professionalism displayed by the team as well as being pleasantly surprised at the cost efficiencies that they have achieved for us. They very definitely represent good valueand make our jobs much easier."

How can bright renewables improve biogas plant efficiency?

To produce gaseous bioCO<sub>2</sub> or liquid bioCO<sub>2</sub> with our in-house CO<sub>2</sub> liquefaction technology. Bright Renewables' biogas upgrading systemand CO<sub>2</sub> liquefaction,bio-LNG,and bio-CNG as ideal add-on technologies form a comprehensive suite to enhance biogas plant efficiency and sustainability.

What is bright renewables CO<sub>2</sub> liquefaction technology?

Bright Renewables CO<sub>2</sub> liquefaction technology supports our expertise in driving energy efficiency, reducing environmental impact, and maximizing economic performance. [...]"

Why should you choose bright renewables?

Bright Renewables provide everything we need and give us peace of mind. Thank you Bright!

Bright Renewables provides biogas upgrading, CO2 liquefaction, and Carbon Capture systems, along with expert support throughout the entire process, from engineering to commissioning. Our systems are designed to ensure high availability and low maintenance costs, with quick commissioning and advanced automatic controls that respond to biogas supply fluctuations.

Bright's carbon capture technology efficiently recovers CO2 from flue gases. Essential for industries including biomass boilers, gas boilers, lime kilns, cement kilns, chemical plants, oxy-fuel plants, fuel cell, and RDF boiler plants, our systems seamlessly integrate into any combustion process with a flue gas.
