

# Bulgaria solar systems for homes

When did smart solar - EOOD start producing electricity in Bulgaria?

On April 15, 2011, SMART ENERGY GROUP's first own 2MWp photovoltaic plant in the village of Rakovskovo was connected to the country's energy system and began producing electricity for the Bulgarian market. We thank SMART SOLAR - EOOD for the demonstrated high professionalism, use of new technologies in the field of solar energy.

What services do we offer in the construction of solar installations?

We offer a whole range of services related to the construction of solar installations - from research and evaluation to installation, maintenance and service. We strive to provide high-quality alternative energy solutions tailored to the needs of our customers.

Why should you install a solar system?

The installed PV system guarantees its owner independence and full control over his electricity costs. In most European countries, solar energy is purchased from electricity suppliers, which allows you to receive money from your solar installation. Solar installations recorded 91% lower CO2 emissions from natural gas and 96% less than coal.

4 ???&#0183; Selling a house with solar panels Selling a home in the UK is a stressful process, but did you know that having solar panels on it could increase your property's value? Tamara Birch 24 October 2024 The top eight myths about solar panels Despite solar's success, there are still some rumours floating about that need debunking - and we're ...
