

Burundi viridity energy solutions

What is viridity energy solutions?

Viridity Energy Solutions is a company providing energy smart grid solutions. It offers a solution toolkit that includes a dynamic linkage between the electric grid and large energy customers, enabling software that takes that linkage and turns customer energy profiles into financial returns, and market execution and implementation services.

What type of energy is used in Burundi?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Burundi: How much of the country's energy comes from nuclear power?

Is investing in Viridity Energy a good decision?

The acquisition of Viridity Energy by a larger company presents opportunities for expansion for the startup. However, the sale price, at first glance, may not be good news for its investors.

What are Viridity and Ormat?

Ormat is a major geothermal energy developer that has now acquired Viridity. Founded in 1965, Viridity is a company that specializes in software capability and has business lines. Ormat also specializes in waste heat recovery, a valuable source of distributed energy at industrial sites that could be targets of Viridity's software.

Is biomass a source of electricity in Burundi?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Burundi: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Will viridity generate a positive operating income this year?

Ormat expects Viridity to generate a positive operating income this year. Under the acquisition, which is expected to close in early 2017, Viridity will 'continue operations and retain current management and staff, as well as maintain all customer relationships and agreements'. Ormat did say this.

Smart grid companies such as Viridity Energy are finding profitable opportunities to help their customers cut energy bills and simultaneously get credit for greater environmental responsibility. But will consuming fewer 'dirty' watts from fuel sources such as coal and natural gas be a sufficient objective for customers in the future? What will rising societal expectations, ...
