

# Can you install solar power on your own roof

Can you install solar panels on a roof?

Most DIY home solar panel installations in the UK are roof mounted. As long as you're happy up a ladder, the process isn't as difficult as you might imagine. We recommend planning in advance where you'll put the panels to determine where you need to install the frames and brackets. It's a lot easier when you have a plan!

Can I install my own solar panels?

Yes, you can install your own solar panels. Sunstore Solar can provide professional installation, but we appreciate some people like to get stuck into a project. We designed our solar panel kits specifically for DIY solar panel installation projects. And what better project than providing energy security for your family or business?

Can solar panels be installed on a roof that faces north?

Solar PV panels are not recommended for a roof that faces north. You also need to consider both the age of your roof and how strong it is, as PV panels are heavy. Shade could be a big problem for solar panels, so no panels should be installed where there is shade from trees, chimneys, walls or other obstructions.

How do solar panels fit on a roof?

The framework will run both vertically and horizontally across the roof, and will support the base of the solar panels. The mounting system makes sure the panels stay in place, while also helping to position the panels at an optimal angle on the roof, which will lead to more sunlight exposure.

Can solar panels be mounted on a flat roof?

For solar panels on a flat roof, mounting systems are slightly different and can include a triangle 'ballast' box to support the panels. For solar thermal panels (with cells that use the sun's heat to warm water in a house) things are a little different.

Can solar panels be installed on a slate roof?

Solar panels are generally compatible with the majority of common roofing materials but they have particular difficulty being installed on slate, cedar, and clay tile roofs. Installing panels on these materials is more difficult because they are prone to damage during installation, but it is not impossible.

Can I install my own solar panels? Yes, you can install your own solar panels. Sunstore Solar can provide professional installation, but we appreciate some people like to get stuck into a project. We designed our solar panel kits ...

You don't need any special permission or certification to install an off-grid solar panel on your shed roof or campervan, or even on an A-frame in your garden. However, you will need to consult your local authority if
