

What can Azerbaijan do to achieve net zero?

The report sets out a strategic roadmap for a resilient and net zero development pathway for Azerbaijan. Highlights include: Clean energy: Azerbaijan has abundant renewable energy resources, wind and solar, which could be exploited to produce green hydrogen and electricity for exports and domestic use in power generation, industry, and transport.

How much does Azerbaijan's new wind power project cost?

The US\$345 million project includes the development of wind farms in Absheron (102 MW) and Khizi (138 MW), two regions in eastern Azerbaijan. It is the first time an independent wind power project in the country is financed by foreign investment and structured as a private-public partnership (PPP).

What are the challenges of Decarbonization in Azerbaijan?

The challenges of decarbonization in Azerbaijan are considerable, given the structure of the national economy. Sectors that are key to the green transition, including energy and water, are dominated by state-owned enterprises, which employ half of the country's workforce.

Can Azerbaijan help reduce climate risks?

BAKU, November 29, 2023 - Urgent action on climate can help Azerbaijan minimize the risks emerging from the global low-carbon transition and protect the living standards of its people, says the World Bank Group's Azerbaijan Country Climate and Development Report (CCDR), released today.

How can Azerbaijan drive a low-carbon transition?

A significant share of this cost should be resourced from commercial and private sector financing. "To drive a low-carbon transition, Azerbaijan will benefit from diversifying its economy away from fossil fuels and harnessing the capital and know-how of the private sector--but time is of the essence.

How will Garadagh help Azerbaijan achieve its climate goals?

Garadagh is the first in a number of potential projects to develop onshore wind, offshore wind, solar and green hydrogen with a total combined capacity of 10GW. This will lead to greater investment and international collaboration as we work together to help Azerbaijan achieve its ambitious climate goals."

COP29 President H.E. Mukhtar Babayev added: "As we work to enhance ambition and enable action on climate change at COP29, we welcome the launch of the Accelerated Partnership for Renewable Energy in Central Asia by IRENA and Azerbaijan's Ministry of Energy. Azerbaijan plays an important role in global energy security, with an ...
