Manatee Energy Storage Center in Florida during construction earlier this year. Image: Florida Power & Light. Work has been completed on the largest battery energy storage system (BESS) to have been paired with solar PV to date, with utility Florida Power & Light (FPL) holding a ceremony earlier this week.

The solar PV project, situated in the Benban area, Aswan Governorate--a region already well known for its solar PV prowess via the 1.8GW Benban project--will be accompanied by a 600MWh battery ...

If going with the flow is how you roll, you will love the Cocos Keeling Islands. They have a small - very small - country town vibe. Your activities revolve around the exquisite lagoon whether they be snorkelling, diving, fishing, parasailing, or just relaxing under a coconut palm reading a book while inhaling the frangipani infused air

A high capacity factor indicates that a power plant or PV system is producing power close to its maximum potential, which means it is operating efficiently. Conversely, a low capacity factor may indicate problems with system performance or sub-optimal operating conditions, such as shading in a solar PV system, which may require corrective actions.
