

How many people have electricity in the Democratic Republic of Congo?

Goma hybrid solar project in the Democratic Republic of Congo According to the World Bank, only 19% of the DRC's around 102 million people have access to electricity. This translates to about 41% in urban areas and 1% in rural areas.

What is the government's vision for power generation in Congo?

The government's vision is to increase the service level to 32 percent by 2030. Lack of access to modern electricity services impairs the health, education, and income-generating potential of millions of Congolese people. Most power generation development is directed and funded by mining companies seeking to power their facilities.

How will Nuru empower 5 million Congolese people?

By delivering world-class renewable energy and connectivity services, Nuru aims to empower 5 million Congolese people, one connection at a time. Moving ahead, it will be important to strengthen the public sector and the government's capacity for cross-unit delivery in order to effectively finance renewable energy mini and metro-grids.

Should solar investors invest in DRC?

Several solar investors have explored the DRC market and are in the process of signing MOUs with the government. The GDRC seeks firms with financing and experience to collaborate with local and parastatal firms to build these power-generating facilities.

Why do Congolese people need electricity?

According to the International Trade Administration, lack of access to modern electricity services impairs the health, education and income-generating potential of millions of Congolese people. "Most power generation development is directed and funded by mining companies seeking to power their facilities."
