What is a commercial photovoltaic system in Cyprus?

Commercial photovoltaic systems in Cyprus are usually used by businesses for self-consumption. That is, the energy generated by the solar panels is solely used for the building where the panels are installed.

Do solar panels work in Cyprus?

Solar panels in Cyprus do absorb more sunlight and generate more electricity on sunny days. However, this does not mean that they do not work if the sun isn't visible to us. The panels do not need direct sunlight to perform. They work on days with bad weather too. When will I start making a profit out of my photovoltaic system?

Does Cyprus support photovoltaic systems?

The government of Cyprus, along with the RES and Energy Conservation Fund, offers support schemes for the installation of photovoltaic systems. This is because solar power is considered to be the future of energy and promoting the use of renewable energy sources is a priority.

What incentives are available for installing photovoltaic systems in Cyprus?

Homeowners in Cyprus can take advantage of several incentives for installing photovoltaic systems, including the recently announced Grant Scheme for the installation of photovoltaic systems, which provides financial incentives for the installation of photovoltaic systems.

What is the maximum power of a net-billing photovoltaic system in Cyprus?
