The World Economic Forum is an independent international organization committed to improving the state of the world by engaging business, political, academic and other leaders of society to shape global, regional and industry agendas. Incorporated as a not-for-profit foundation in 1971, and headquartered in Geneva, Switzerland, the Forum is tied to no ...

Within the developing world, solar energy projects are only as strong as the infrastructure around it that will allow it to be delivered. This is a problem in many developing countries, as they lack the foundation and the money to maintain more extensive networks of power infrastructure. Therefore, microgrids are a great option for those who ...

Ralsko Solar Park. It is the biggest solar station in the country and by 2012 ranked among the world's top 50 PV plants. The plant is comprised of 5 sections, each with a capacity of 12.869, 14.269, 4.517, and 6.614 megawatts with a total capacity of 38.3 MW. This capacity is enough to power ten thousand homes.

Czechia is a prosperous market economy that boasts one of the highest GDP growth rates and lowest unemployment levels in the EU, but its dependence on exports makes economic growth vulnerable to contractions in external demand. Czechia's exports comprise some 80% of GDP and largely consist of automobiles, the country's single largest industry.
