

How many solar power plants did Czechia build in 2023?

Czechia built around 1 GW of new PV plants in 2023, according to data from the Czech Solar Association (Solání Asociace). In total, 82,799 solar power plants were connected to the grid, with a combined total output of 970 MW. The nation achieved a record-breaking year with 145% growth, connecting 49,000 more power plants than it did in 2022.

How many solar power plants are in Czechia?

A total of 82,799 solar power plants were connected to the grid in Czechia last year. Image: CEZ Group
Czechia recorded a significant increase in installed solar capacity last year, with about 970 MWp of capacity added to the grid. However, the growth was mainly driven by household rooftop solar, according to the Czech Solar Association.

Why is the solar market growing in Czechia?

The figures mark a period of rapid growth in Czechia's solar market. The growth has been largely driven by residential PV, with most of the new installations (80,069) being domestic PV plants, supported by the country investing an additional CZK 55 billion (\$2.5 billion) in its New Green Savings program back in March 2023.

Does Czechia need more energy storage capacity in 2023?

Czechia registered strong PV capacity growth in 2023, driven by a surge in residential installations. The nation's PV association says it expects a shift toward larger power plants in the coming year, but notes the need for more energy storage capacity.

Why should you invest in photovoltaic technology in the Czech Republic?

Over the years, we have become a stable leader in the sale of photovoltaic technologies in the B2B segment in the Czech Republic thanks to excellent know-how and a dynamic approach to the latest technologies. We are gradually expanding and becoming a significant player in foreign markets as well.

Czechia: tax guide for expats Since the country joined the EU on 1 May 2004, the system being used in this European country has undergone a lot of changes to adapt to European legislation . This European country also has a broad network of double taxation treaties with other EU states and some non-EU countries.

However, the number of solar panels put into operation in Czechia fell by 21,000 in 2024 compared to 2023, pointing to a slowdown in the residential market. The Solar Association attributed the decline in solar panel installations to the "overall calming of the situation on the energy market," a drop in energy prices, and changes to the ...
