

# Datasafe battery Cuba

What is a datasafe battery?

The EnerSys 12HX330 Datasafe Battery is a valve-regulated lead-acid battery designed to offer superior solutions for the Information Technology and Uninterruptible Power Supply markets. DataSafe HX batteries are the ideal source of power to protect vital systems.

What is a datasafe HX 12V battery?

EnerSys UPS Batteries, DataSafe HX 12V, are valve regulated lead acid batteries that have been designed to offer superior solutions for the UPS, IT and Telecom (select models) markets which demand the highest levels of security and reliability. DataSafe HX top terminal batteries are the ideal source of power to protect vital systems.

Are datasafe HX+ batteries eco-friendly?

With electricity costs and data center energy demands on the rise, the Uninterruptible Power Supply (UPS) industry is looking for innovative, eco-friendly power management solutions. DataSafe HX+ batteries deliver them for a range of mission-critical power back-up applications. [Request a Quote](#)

What is a datasafe HX top terminal battery?

DataSafe HX top terminal batteries are the ideal source of power to protect vital systems. DataSafe HX top terminal batteries incorporate select design features that maximize reliability while ensuring superior performance and an excellent service life.

How long does a datasafe battery last?

The addition of an EnerSys Front Terminal DataSafe cabinet allows for higher energy density, and the UL 1778 standard-meeting flame-resistant case and cover ensure that the battery reaches its full 10-year lifespan. DataSafe HX batteries are supplied in a charged condition and are capable of extremely high short circuit currents.

What is datasafe 12hx300?

EnerSys created the DataSafe 12HX300 for low-ventilation, high-rate applications, and vital systems. This unique battery combines the power of 12V with a low level of gas evolution, earning its approval for air freight applications.

NPX batteries offer 50% ...

BBM supplies the Enersys Datasafe 12HX100R-FR Battery. Delivering 12V/26AH (104W per Cell) of power, this 12H100 battery provides the utmost in reliability and performance. Enersys brings more than ten decades of battery ...

The DataSafe CX-M battery was designed for easier maintenance since all the posts and connectors reside above the cell cover; maintenance routines, including individual cell monitoring and intercell resistance measurements are simplified. The economical design and footprint, combined with Slide-Lock post and excellent performance in short ...

We can help size your battery requirements for various applications using industry recommended practices such as IEEE485-2020 Call our technical support team @ 800-533-1337 or complete the Contact Us form. BUY NOW!

The Enersys 12HX330 Datasafe Battery is a valve-regulated lead-acid battery designed to offer superior solutions for the Information Technology and Uninterruptible Power Supply markets. DataSafe HX batteries are the ideal ...

The Enersys 12XE1150F-FR DataSafe battery has been developed to meet the challenging demands of the modern UPS market sector. Conventional Uninterruptible Power Supply (UPS) batteries that historically focused on a 15 ...

ENERSYS DATASAFE&#174; 12HX540-FR BATTERIES. Power Storage Solutions is a premier platinum stocking Distributor for the Datasafe 12HX540 batteries. We maintain the batteries in a climate controlled environment, then charge and test each unit prior to shipment. The DataSafe&#174; HX top terminal battery range of Valve Regulated Lead Acid (VRLA) ...

The recommended charging method for DataSafe HX batteries is current limited, constant voltage charging. Refer to Table 1 for the current limits for each battery model. State of Charge The battery state of charge can be determined approximately by measuring the open circuit voltage after the battery has been at rest for a minimum of 24

The DataSafe&#174; HX top terminal battery range of Valve Regulated Lead Acid (VRLA) batteries has been

Compared to conventional monobloc Valve Regulated Lead Acid (VRLA) batteries, DataSafe XE batteries offer long life, faster recharge times, lower energy consumption, and a wider operating temperature range. The result is greater reliability with Total Cost of Ownership (TCO) savings of up to 25 percent.
