

Does solar power generation need to be registered

Do I need to register my energy device?

Apply for relevant energy efficiency schemes. If you are planning to install an energy device in your home or small business, you are required to register your energy device with your Distribution Network Operator (DNO), the company that is responsible for bringing electricity to the property where you are installing the device.

Can a person own a solar PV installation?

While an individual can own the solar PV panels installed at their property, there are instances where the owner of an installation may be different from the owner of the property or site at which the installation is located.

Do you need planning permission to install solar panels?

Current rules that require businesses to apply for planning permission if solar panels will generate more than one megawatt of electricity will also be scrapped, meaning organisations will be able to install more solar panels on rooftops without the delay and cost of applying for planning permission.

Do solar panels comply with building regulations?

Your solar panel system must comply with building regulations in terms of structural integrity, electrical safety and fire safety. These regulations may vary depending on the size and type of the installation. It's advisable to work with accredited installers who are familiar with these requirements.

Why do energy devices need to be registered?

Registering your energy asset is critical to reducing the risk of local blackouts, which can result from too many unknown assets turning on or off at the same time. Which energy devices need to be registered?

How long does it take to register an energy device?

If MCS certified, the installation contractor must register the energy device with MCS's Microgeneration Installation Database (MID) within 10 days of installation. If TrustMark registered, and work is funded by certain energy efficiency schemes, the installation contractor must register the installation in the TrustMark Data Warehouse.

3 Description of your Solar PV system Figure 1 - Diagram showing typical components of a solar PV system The main components of a solar photovoltaic (PV) system are: Solar PV panels - ...
