

Does the staff locker have a master key

What is a master key lock?

The Master Key Lock distinguishes itself within the Master Key Suite with its unique lock pins, allowing both a standard and a master key to operate it. This innovation grants the lock unmatched flexibility and security, setting it apart from conventional locks.

Does Lowe & Fletcher have a master key?

Many of Lowe & Fletcher's locks come with a master key if required, most commonly for caretakers or building owners who require a master key door lock system in case of misplaced or stolen keys. A master key allows the keeper to open a number of locks from one key, despite each lock having its own individual key.

What is a Master Key System?

A master key system is ideal for improving building management and key control, striking the perfect balance between mechanical locks and access control. How does a master key work? All members of staff have one key that opens specific doors that are relevant to their roles, with the master key holder able to open all doors across a site.

What is the difference between mastered and non-mastered locks?

Locks that are mastered are manufactured to open using the key as supplied and a master key. So if any of the keys are misplaced, the master key can be used to open any of the locks in that particular set or suite. Locks that are non-mastered can only be opened by the key supplied with the lock.

Can I have a master key for a non-mastered lock?

You cannot have a master key for a lock that is non-mastered. Master keys are difficult to replicate, meaning that a high-street key replacement service may not be able to replicate the key to a working level. If you require a replacement of the master key, it is recommended that you contact your lock supplier directly.

Can a Master Key System include a padlock?

Yes, padlocks can be incorporated into UNION master key systems. Also, UNION master key systems can be created with a range of cylinder lock types, ensuring the entire facility can be covered. What are the security benefits of a master key system?
