

Dominican Republic 12kva solar system price

What is the Dominican Republic's solar edict?

The edict created incentives for renewable energy generation in the Dominican Republic. As the leading economy in Central America, the Dominican Republic is home to several solar equipment manufacturers and distributors. They deal in various categories of solar equipment, including solar panels and inverters.

How many solar projects have you installed in the Dominican Republic?

In the Dominican Republic alone, we've installed over 300 solar projects, and our portfolio is expanding quickly throughout the region. During every stage of your solar project, you will only interact with highly qualified professionals who know how to get results.

How much does a 12 kW solar system cost?

As of January 2022, the average cost of solar in the U.S. is \$2.77 per watt (\$33,240 for a 12-kilowatt system). That means that the total cost for a 12kW solar system would be \$24,598 after the 26% federal solar tax credit discount (not factoring in any additional state rebates or incentives).

What is the future of the Dominican Republic's solar market?

As for the nation's overall solar market outlook, it is safe to say the future is bright. The Dominican Republic's solar market is one of the most lucrative and promising markets in Central America. This is primarily due to its issuance law 57-07 of 2007. The edict created incentives for renewable energy generation in the Dominican Republic.

How much electricity does a 12 kW solar system produce?

Below is a table with estimated average electricity production numbers for 12 kW solar energy systems in cities across the United States. As a comparison, the average U.S. household uses 893 kilowatt-hours (kWh) a month, a total of 10,715 kWh per year. We developed these estimates using PV Watts.
