

Dominican Republic all cell technologies

Is the Dominican Republic a good place to invest in electronics?

Sitemap The Dominican Republic is a leading candidate for nearshored investments in advanced manufacturing activities for the U.S. and regional markets--particularly electronics like printed circuit boards (PCBs) and the assembly, test, and packaging (ATP) of semiconductors--according to a new report.

What telecommunications are available in the Dominican Republic?

Telecommunications in the Dominican Republic include radio, television, fixed and mobile telephones, and the Internet. Numerous television channels are available. Tricom, S.A., WIND Telecom, S.A., Viva (network operator), and Claro Codetel provide television services digitally, with channels from Latin America and elsewhere in the world.

How many electronics companies are in the Dominican Republic?

Twenty-five leading electronics companies are active in the Dominican Republic's FZs, led by enterprises such as Eaton, Rockwell Automation, Jabil, Fenix Manufacturing Solutions, and Cutler Hammer Industries; 16 of these 25 electronics companies are headquartered in North America, with 22 of the 25 the subsidiary of a foreign parent.

Can the Dominican Republic compete in semiconductor ATP and PCB manufacturing?

The business environment section examines the country's infrastructure, education, and workforce training programs. The remainder of the report explores the Dominican Republic's potential capacity to compete in semiconductor ATP and PCB manufacturing activity specifically.

Where are electronics manufacturers located in the Dominican Republic?

Most of the electronics manufacturers in the Dominican Republic are concentrated on the country's southeastern coast around the provinces of San Cristóbal, Santo Domingo, and San Pedro de Macorís, although there is another important cluster in the northeastern part of the country centered around the Santiago province. (See figure 4.)

Is the Dominican Republic a tech hub?

The Dominican Republic is not usually the first place that comes to mind when someone mentions the words fiber optics, tech hub, or digital revolution. Historically, the country's economy has been based on its strengths as an agricultural exporter.
