

What is Echandia battery system?

Echandia has developed a lightweight, high-performance battery system based on Toshiba's LTO (Lithium-Titanium-Oxide) cells. This new generation of batteries is extremely fast charging and delivers high power instantly. In 2020 Echandia will launch a breakthrough 6c system that will allow us to fully charge a battery system in less than 10 minutes.

Are Echandia batteries lighter?

Our battery systems can be up to 50% lighter and significantly smaller than most alternatives. This is possible because our systems require less oversizing to meet the energy requirement. Offering both power and safety, the Echandia battery system is built for heavy-duty applications and certified for maritime use.

What kind of battery does Echandia use?

Echandia's lightweight, high-performance battery system uses Toshiba's LTO (Lithium-Titanium-Oxide) cells. Echandia is Toshiba's preferred marine module integrator. The result is a fast-charging battery that delivers high power instantly. In 2020, Echandia will launch a breakthrough 6c battery system that can be charged in less than 10 minutes.

What is Echandia energy?

The Echandia Energy battery system is an air-cooled, lithium-ion battery system, certified for maritime heavy-duty usage. With its lightweight rack construction and high performance, Echandia Energy is ideally suited for applications that require safe operation over a long lifetime.

How long does it take Echandia to charge a battery?

In 2020 Echandia will launch a breakthrough 6c system that will allow us to fully charge a battery system in less than 10 minutes. Our Products LET'S CONNECT

How long does Echandia energy battery last?

Echandia Energy can live up to tough cycling conditions over longer durations, typically six minutes or longer per cycle. The capabilities of Echandia Energy battery system solve multiple challenges for energy demanding operational profiles. It will deliver energy with a guaranteed functional life expectancy of at least five years.

Echandia Battery Systems. Offering both power and safety, the Echandia battery system is built for heavy-duty applications and certified for maritime use. Is it a good fit for your project? Get all the details and technical specifications here. ...

Swedish maritime battery system supplier Echandia has secured an order for battery systems which will be installed on four vessels with hybrid propulsion. Echandia. As disclosed, these battery systems are intended for installation in a total of four vessels scheduled for production starting in 2024.

Echandia has rapidly grown to become one of the world's leading maritime battery system providers, having delivered nearly 70 systems for electrification projects globally. Echandia's battery systems are recognized as the safest, most resilient, and longest-lasting maritime battery systems available. For more information please contact:

The Echandia Energy battery system is an air-cooled, lithium-ion battery system, certified for maritime heavy-duty usage. With its lightweight rack construction and high performance, Echandia Energy is ideally suited for applications that ...

Echandia focuses on building large scale battery systems that can handle the toughest requirements and demands for safety, durability, size, weight and cost. Echandia adheres to all relevant regulatory demands and build it business practices on solid corporate governance structures and financial reporting that lives up to high quality standards.

Press release from Echandia: MARYSVILLE, JULY 30 - In response to the rapidly increased demand in America's maritime electrification sector, Echandia has chosen the Marysville Corporate Center as their first home in North America.Echandia will begin producing its advanced Lithium Titanium Ion battery system, the safest, most resilient, and longest-lasting ...

A ribbon cutting on Tuesday at Echandia's new Marysville, Wash., facility with Gov. Jay Inslee (second from left) and Echandia CEO Fredrik Hellström (center). The company manufactures batteries ...

Targets are set for shipping to be emission free by 2050. So quite likely, your next project contains batteries. Echandia provide solutions and collaboration that lets shipowners and operators go from running fleets on fossil fuels, to build an ...

Echandia, a developer of heavy-duty energy storage solutions for maritime applications, ... Echandia to deliver battery systems to highly specialized naval sector. By Callum Brook-Jones June 6, 2022 1 Min Read. Magnus Eriksson, CEO of Echandia Share. LinkedIn Twitter Facebook Email.

MARYSVILLE--Leading Swedish provider of maritime battery systems, Echandia, opens its first US-based production facility in Marysville, adding over two dozen living-wage jobs to the region's expanding Cascade ...

Echandia General Information Description. Developer of battery systems designed to provide zero-emission energy for maritime, rail and wind power. The company"s systems deliver high power instantly through fast-charging technology and also ensure full performance and safety over their longer lifetime, enabling

clients to incorporate the use of sustainable energy assets ...

The LTO battery chemistry is often misunderstood as more expensive and heavier, but for maritime applications, its capabilities and qualities often make the system both lighter and more cost-efficient than most other ...

In the past, Echandia have successfully delivered battery systems to the tugboat market and commuter passenger ferries, like the ones in Copenhagen and Kochi, India for example. The contract for the new Molslinjen ferries represents a significant step for Echandia into the market segment for larger RoRo and RoPax ferries.

With a more efficient battery that also offers a long lifecycle, less oversizing is required to meet target power outputs over the battery's life. So far, Echandia's LTO battery systems have been tested to remain viable for ...

Echandia USA 4415 156th Street N.E., Suite 190 Marysville, Washington 98271, USA +1-360-854-3899 echandia.llc@echandia.se. ... combined with the products high level of safety and low weight were key factors in selecting Echandia as battery supplier. In addition, choosing a system with longer lifetime makes perfect sense from a sustainability ...

Echandia, a developer of heavy-duty energy storage solutions for maritime applications, has announced that it has received an initial order for battery systems to be used in a highly specialized naval sector.

September 15, 2023 at 0:35pm BST. HARLAND & Wolff has announced a partnership with Swedish energy systems supplier Echandia to develop battery technology for use in new vessels.

The partnership gives H& W exclusive distribution rights for battery sales in the UK, Ireland and Australia for the maritime sector. HWT will also establish a UK assembly line ...

Echandia works with the world's largest shipyards and system integrators to equip new and retrofit vessels with batteries for hybridisation, full propulsion, and increased energy efficiency. Echandia has successfully ...

Echandia is the second maritime-battery firm to start production in Washington. In 2022, Norwegian-owned battery system builder Corvus Energy announced the construction of a new factory at the ...

The LTO battery is perfect when there's a need for safe and super fast charging. In three minutes (3) it can be charged up to 80 percent without causing dendrite build up that eventually will degrade the battery and ...

Echandia is a world-leading provider of zero-emission energy systems for heavy-duty industry. We deliver the world's most advanced LTO battery modules for the maritime and rail markets. ...

Morten Larsen, regional director at Echandia EU, added, "This order once again demonstrates the recognition of Echandia's battery systems within the maritime market, particularly in Denmark. Following the successful deployment of harbor buses in Copenhagen in 2020 and securing the contract for Molslinjen's ro-pax ferries for Als and ...

Swedish maritime battery system supplier Echandia has received an order to deliver battery systems to a Northern European ferry operator. Courtesy of Echandia. The order involves converting two roll-on/roll-off passenger (RoPax) ferries to pure electric propulsion. Delivery is planned for the second half of 2025.

Echandia's LTO-battery system provides more power than conventional batteries, reducing the charging time to 10 minutes for a one-hour run time. The project took 2 years from start to finish and the supercharged ferry was put into traffic in Stockholm summer of 2019.

Swedish maritime battery system supplier Echandia has received an order to deliver battery systems to a Northern European ferry operator. Courtesy of Echandia. The order involves converting two roll-on/roll ...
