As others have pointed out, Energy Saver mode uses a combination of the two heating elements and the heat pump to optimize efficiency. The issue with heat pumps is that as the temperature differential between the refrigerant and water becomes smaller, so does the coefficient of performance (COP); i.e., the efficiency decreases.

Other energy-saving controls you employ in your place: Do you already have existing power loss control measures in your home? If you do, the effect of an electricity-saving device on your net energy usage will be less noticeable. ... Sumerly Energy Saver 80KW . Price range: \$14.39 - \$26.94 .
