

Energy control systems Sri Lanka

Does Sri Lanka have a power grid?

Sri Lanka has already achieved a grid connectivity of 98 percent, which is relatively high by South Asian standards. Electricity in Sri Lanka is generated using three primary sources: thermal power (which includes coal and fuel oil), hydropower, and other non-conventional renewable energy sources (solar power and wind power).

How much electricity does Sri Lanka need?

From 2018 - 2037, Sri Lanka plans to add 842 MW of major hydro, 215 MW of mini hydro, 1,389 MW of solar, 1,205 MW of wind, 85 MW of biomass, 425 MW of oil-based power, 1,500 MW of natural gas and 2,700 MW of coal power into the electricity generation system. The annual total electricity demand is about 14,150 gigawatt hours (GWH).

How will Sri Lanka achieve 70 percent electricity production by 2030?

The Sri Lankan government aims to achieve 70 percent electricity production by renewable sources by 2030 and net carbon zero by 2050. The objective is to increase the power generation capacity of the country from the existing 4,043 megawatts (MW) to 6,900 MW by 2025 with a significant increase in renewable energy.

Will Sri Lanka add liquefied natural gas plants?

Sri Lanka plans to add additional renewable and nonrenewable power plants over the next 10 years, including liquefied natural gas (LNG) plants. The government is working to develop LNG import facilities and related power plants and is considering options for its aging oil refinery.

NIKINI AUTOMATION SYSTEMS PVT LTD is a Sri Lankan exporter of quality products to the global market registered with the Sri Lankan Export Development Board ... Control Systems, Coding & Packaging Solutions, IIoT & Software ...

consumption (Sri Lanka Sustainable Energy Authority 2020) . Hence, the Sri Lankan government has taken initiatives ... Similarly, a control system can integrate with various components to achieve ...

We equip your facilities, machinery, and appliances with the selected energy monitoring devices: Robust electricity counters for homes and offices or industry-grade sensors for harsh environments. Power monitoring gateways to ...
