

# Enlighten battery Kiribati

What is Kiribati integrated energy roadmap?

The resulting Kiribati Integrated Energy Roadmap (KIER) highlights key challenges and presents solutions to make Kiribati's entire energy sector cleaner and more cost effective. As a small, remote island state, Kiribati is highly dependent on imported energy supply. Electricity is one of the government's largest expenditures.

Does Kiribati need electricity?

As a small, remote island state, Kiribati is highly dependent on imported energy supply. Electricity is one of the government's largest expenditures. Yet the current fossil fuel-based power system is inadequate to meet future demand.

What does enlighten do?

We believe that in accelerating impactful innovation to unlock long-term success. Enlighten is committed to finding new ways of making clean, competitive energy solutions. Learn how we play a role in global energy and specialty chemical markets.

Is Enlighten NASICON ready for manufacturing scale-up?

NaSICON is commercial and ready for manufacturing scale-up. Enlighten's long duration energy storage (LDES) decouples power and energy. It allows storage capacity to match market requirements. NaSICON provides higher energy density than other flow battery technologies and beats Li-Ion on cost at 7+hours.

Who generates electricity in Kiribati?

Sector context. Grid-connected electricity in Kiribati's capital, South Tarawa, is generated and distributed by the Public Utilities Board (PUB), a state-owned electricity and water utility.

Why are there no independent power providers in Kiribati?

Also, despite the potential for revenue generation from the high electricity costs, there are currently no independent power providers in Kiribati. Barriers to private sector investment include (i) lack of an enabling policy and regulatory framework, (ii) credit worthiness of PUB as an off-taker, and (iii) small transaction sizes.<sup>8</sup>

a discreet appearance, and versatility that lets you dial in the voltage from 3.4V to 4.0V for compatibility with a wide range of oils. This battery has a 650 mAh battery for long lasting sessions and less frequent recharges.

I see a new function on the battery charge from grid screen. Mine is set for charge when under 30%..... the charge to 100% during this schedule is not checked. Every night at midnight the batteries start charging and continue until they get to 100%. This function does not appear to be working correctly. By charging at night there is little to charge in the day.
