Why should you invest in ESS Technology in Australia?

"We look forward to deploying ESS technology in Australia and the region to meet the needs of energy customers and build a sustainable, resilient energy future," said Eric Dresselhuys, CEO of ESS. "ESI brings a wealth of experience and expertise in clean energy and energy storage and a keen understanding of the Australian energy market."

What is ESS & Energy storage industries' partnership with ESI?

ESS and Energy Storage Industries formed a partnership to assemble and distribute large-scale iron flow batteries across the Oceania region. Under an agreement signed in 2022, ESS will initially supply Energy Warehouse systems manufactured in the US to ESI.

What is ESS Energy Storage?

ESS systems provide resilient, sustainable energy storage well-suited for multiple use cases including utility-scale renewable energy installations, remote solar + storage microgrids, grid load-shifting and peak shaving, and other ancillary grid services. ESS technology is safe, non-toxic and has a 25-year lifespan without capacity fade.

What does ESS Inc do?

The flow battery company said today that the partnership covers distribution and manufacture of devices using ESS Inc technology in Australia, New Zealand and the Oceania region. ESS Inc will deliver 70 Energy Warehouse units of 750kW/500kWh each during the rest of this year and in 2023.

What is the energy savings scheme (ESS)?

The Energy Savings Scheme (ESS) aims to deliver cost-effective energy savings for NSW households and businesses by providing financial incentives to install energy-efficient equipment and appliances. Between 2009 and 2022, the scheme has supported projects that will deliver 48,000 gigawatt hours (GWh) of energy savings by 2033.

Could ESI be sourcing 80% of its energy components from Queensland?

ESI has previously said that up to 80% of components could be sourced from within Queensland. ESS Inc claimed the deal could result in the deployment of up to 12GWh of its technology. "ESS is an ideal technology partner to meet the extraordinary demand for long-duration energy storage in Australia and the region."

In August 2023, the government of Queensland, Australia announced two initial utility projects incorporating Energy Warehouse systems, manufactured by ESS in the United States and supplied by ESI. These projects, the Stanwell Clean Energy Hub and an Energy Queensland network battery project, are the first of their kind in Australia and will demonstrate the key role ...
