

Exagrid datasheet Tokelau

What is ExaGrid?

ExaGrid provides tiered backup storage with a unique disk-cache Landing Zone, long-term retention repository, and scale-out architecture. ExaGrid's Landing Zone provides for the fastest backups, restores, and instant VM recoveries. The disk-cache Landing...

How many TB does ExaGrid have?

ExaGrid offers building blocks in 1, 2, 3, 4, 5, and 10 TB units. These are not 1-10 physical TB, but rather systems designed for backing up their rated size of data AND include room for all the de-duplicated backup retention and history.

Can ExaGrid appliances be deployed in the backup application software?

and with ExaGrid there are no agents to deploy or manage. When comparing ExaGrid appliances deduplication in the backup application software, it is important to keep in mind that using deduplication in the backup application software typically requires greater resources on the backup

Does ExaGrid support multi-site topology?

ExaGrid supports the ability to have two or more sites in a multi-site topology. At each site, backup applications can write data to the ExaGrid in place of sending backup data to tape. This is called backup to disk (or D2D).

Which backup products are supported by ExaGrid?

The industry's most popular backup and data protection products are supported by ExaGrid including: CA ARCserve, Symantec Backup Exec, Symantec NetBackup, CommVault Simpana, EMC Networker, Microsoft SQL dump, VMware (VMDK), Oracle RMAN and others. Consult ExaGrid for an expanded list of supported backup applications and data types.

Will ExaGrid go up more than 3% per year?

tion - won't go up more than 3% per year About ExaGrid ExaGrid provides Tiered Backup Storage with a unique disk-cache Landing Zone, long-term retention repository, and scale-out architecture. ExaGrid's Landing Zone provides fo

Download Data Sheet. Meet ExaGrid in our Corporate Video ... ExaGrid's full appliances in a single system bring a scale-out architecture to backup storage with performance of 516TB/hr. for a 6PB full backup. For a partial list of ExaGrid's enterprise customers, click here.

DATA SHEET ExaGrid Product Line Configurations High Performance Hyper-converged Secondary Storage for Backup with Data Deduplication ExaGrid's disk backup with data deduplication system is the only solution purpose-built for backup that leverages a unique architecture optimized for scalability, performance,

Exagrid datasheet Tokelau

and price.

The ExaGrid Tiered Backup Storage product line consists of seven appliance models. Each appliance is sized for a full backup and for long-term retention. Any ExaGrid appliance can be mixed and matched in the same scale-out system ...

ExaGrid offers a series of various-sized backup storage appliance models that can be mixed and matched in a scale-out secondary storage for Tiered Backup Storage. Any size or age appliance can co-exist in the same system and can scale from a 10TB full backup to a 6PB full backup in a single system. The system is flexible since the proper size ...

A Closer Look: Security checklist for quick and easy implementation of best practices.; Ransomware Recovery: ExaGrid offers the only two-tiered backup storage approach with a non-network-facing tier (tiered air gap), delayed deletes, and immutable objects to recover from ransomware attacks.; Encryption: ExaGrid offers FIPS 140-2 Validated hardware-based disk ...

ExaGrid supports a wide variety of backup applications, utilities, and direct database dumps. In addition, ExaGrid allows multiple approaches within the same environment. An organization can use one backup application for its physical servers, a different backup application or utility for its virtual environment, and also perform direct Microsoft SQL or Oracle RMAN database dumps ...

ExaGrid Systems, Inc's EX-10GBE-OPTICAL is a 10 gigabit ethernet dual port sfp+ optical option for all exagrid models. includes two qualified sfp+ short-range modules.. in the computer networks, network interface cards category. Check part details, parametric & specs updated 24-NOV-2024 and download pdf datasheet from datasheets , a global distributor ...

Data Sheet. ExaGrid's Value and Functionality for DORA . The Digital Operational Resilience Act (DORA) is a EU regulation that entered into force on 16 January 2023 and will apply as of 17 January 2025. ... View Data Sheet » Video. Successful Ransomware Preparedness in 2024 . Together in this custom ESG webinar, ESG Principal Analyst Simon ...

ExaGrid Systems, Inc's EX10 is an exagrid appliance 32tb raw capacity. in the servers, network servers category. Check part details, parametric & specs updated 10-NOV-2024 and download pdf datasheet from datasheets , a global distributor of electronics components.

How Does ExaGrid Address Backup And Restore Performance On NetBackup? When you choose ExaGrid's Tiered Backup Storage for Backup for NetBackup, each ExaGrid appliance includes a disk cache Landing Zone. Backup data is written directly to the Landing zone versus being deduplicated on the way to the disk.

ExaGrid Systems, Inc's EX7000-SEC is a server, intel processors, enterprise sas drives, fips 140-2 self-encrypting sas drives, raid6 with hot spare, redundant fans, redundant power supplies, exagrid software, 19 inch rack mount chassis. in the servers, network servers category. Check part details, parametric & specs and download pdf datasheet from datasheets , a global ...

The ExaGrid Cloud Tier allows customers to replicate deduplicated backup data from a physical onsite ExaGrid appliance to the cloud tier in Amazon Web Services (AWS) for an offsite disaster recovery (DR) copy. The ExaGrid Cloud Tier is a software version (VM) of ...

ExaGrid is an Arcserve technology partner - providing the Arcserve customer a highly cost-effective alternative to tape backup. ExaGrid supports Arcserve Backup, Arcserve D2D, and Arcserve Unified Data Protection (UDP). ... Download Data Sheet. Talk to us about your needs. ExaGrid is the expert in backup storage--it's all we do.

ExaGrid Appliances Connect to Form a Single Scale-Out System ExaGrid appliances are comprised of processors, memory, networking, IPMI, RAID 6, and a hot spare drive per appliance, using enterprise-class SAS drives and ExaGrid software . See the ExaGrid Technical Specifications data sheet for more details .
