

Fiberglass photovoltaic bracket tax rebate

Are UK government grants available to reduce solar panel costs?

A detailed look at UK government grants available to reduce solar panel costs. Solar panels are becoming an increasingly common option for UK households, giving people the option to produce their own green energy. One issue that many people face, however, is the price of solar panels and organising installation.

Are solar panels VAT free in the UK?

Since April 2022, UK homes have been able to benefit from zero VAT on solar panel materials and installation. The scheme ends in March 2027 and returns to 5% VAT. While it's at 0%, the average family can save more than £1,000 when choosing to have solar panels installed and up to a further £1,180 a year on energy bills.

What happens if a UK solar panel grant expires?

Several UK solar panels grants have recently expired. In most cases, the schemes had fixed durations or budgetary limits - once a certain date was reached or the available funding ran out, the grant was closed to new applicants. The following are some examples of recently expired schemes:

Do solar panels qualify for a reduced VAT rate?

Under the Government's green incentives, some energy-saving materials and equipment (including solar panels) qualify for a reduced VAT rate. The rate is typically 20% for energy-saving goods and services, but it's currently set to 0% until 31 March 2027. This applies to the supply and installation of solar panels in England, Scotland and Wales.

Are green homes grants still available for new solar panels?

Please note: the Green Homes Grant, as well as the feed in tariff are no longer available for new solar installs. You can earn money from your solar panels via the Smart Export Guarantee. The VAT reduction scheme means you will pay 0% VAT on new solar panels, which are set to run between April 2022 and April 2027.

Are free solar panels available in the UK?

At present no, free solar panels are not available in the UK. Back in 2010, many solar companies would practically install solar panels for free, this was largely due to the incentives of the Feed-in tariff. However, since the feed-in tariff ended, this incentive no longer exists and so solar companies are back to charging for solar panel installs.
