

Field solar bracket door-to-door maintenance

What is full tilt solar racking?

With over 20GW of solar racking delivered as a contract manufacturer and backed by decades of engineering and global supply chain experience, Full Tilt represents an optimal fixed tilt racking solution. The system boasts an innovative yet straightforward design with fewer parts and rapid installation features along with manufacturer direct pricing.

Do solar panels need a remote operating system?

A remote operating system means that you don't need to tilt it by hand, so one doesn't need to access the solar panels to do this. It's beneficial if the solar panels are in an inconvenient area, like roofs. However, this also means the system has many moving parts requiring maintenance and repair.

What are the advantages of Omco solar's Universal module Mount?

Advantages: OMCO Solar's Universal Module Mount rapidly and easily secures modules to the OMCO Origin 1P Tracker with just 2 bolts per module. Bolts can be tightened from below, so ladders are not needed, and installation is fast and safe. The module mount universal design can handle frames from 25 mm to 50 mm high.

What is an a-frame solar tracker?

The A-Frame uses a standard I-beam section to the solar tracker system. This allows seamless transition from driven I-beams to the A-Frames, leaving connection hardware the same. The leveling flanges allow for up to 20 in. of height adjustment to keep the A-Frame plum and level.

What is a solar panel lift frame?

The brackets are the lift frame and securely fasten the solar panel to the surface to which it is attached. Everything is attached to the brackets, the solar panel, actuator, rotation pin, and whatever else the kit might have. Frames need to be sturdy and capable of folding flat so that you can place down the solar panel.

What are the foundation options for OMCO solar?

Foundation options include OMCO-produced driven C posts (preferred), driven I or W posts, and ground screw foundations. Advantages: OMCO Solar's Universal Module Mount rapidly and easily secures modules to the OMCO Origin 1P Tracker with just 2 bolts per module.
