As we know the HV2600 battery is being updated to include a new comms chip (due to chip shortages) which means that a BMS upgrade is required to use V2 batteries going forward. FoxESS are running an RMA process to replace free to charge any customers who have a V1 BMS or HV2600 and now require a V2 BMS due to adding extra V2 HV2600's.

How many volts is a hv2600?

Normally HV2600 are around 53volts. 20 voltages sounds like permanent damage has occurred. I assume you have the BMS connected to an inverter right? then you set the dip switches to the correct dip position, turn on the main MCB breaker and then press the silver power button on the BMS. Then I would tell your inverter to do a force charge asap.
