While the proportion of renewable energies in France's gross final energy consumption was 24.2% in 2020, thus above France's 2020 target of 23% set out by the EU Directive 2009/28/EC on the promotion of the use of energy from renewable sources, this proportion decreased below this target in 2021 due to unfavorable weather conditions for ...

World Energy GH 2 is thrilled to deliver tangible support to our friends in Europe who urgently need reliable sources of clean energy," said John Risley, director, World Energy GH 2.

1 ??· France - Resources, Power, Economy: Compared with its agricultural resources, the country is far less well-endowed with energy resources. Coal reserves are estimated at about 140 million tons, but French coal suffered from being difficult and expensive to mine and from its mediocre quality. In 1958 annual production amounted to some 60 million tons; 40 years later ...
