Solar panels for 100% green energy. Solar panels would in the first instance, allow a technology learning curve. Further extending the number of panels would bring additional power to the Spaceport to supplant an aging French Guiana grid by 100% green energy. In the future, solar energy would be used to recharge fuel cells at the Spaceport.

French Western Guiana Solar PV Park is a ground-mounted solar project. The project is expected to generate 50GWh electricity and supply enough clean energy to power 10,000 households.

"Solar panels would in the first instance, allow a technology learning curve. Further extending the number of panels would bring additional power to the Spaceport to supplant an aging French Guiana grid by 100% green energy," said Teddy Peponnet, CSG Renewable NRJ transition project manager at the Spaceport.

Construction has begun on a new biomass energy generation station in French Guiana, helping the South American French territory move closer to its renewable energy goals for 2023.. Paris-based Voltalia said it is now building the 5.1-MW Cocoa biomass power plant, with a planned commissioning date in 2020.
