

What is French Guiana doing to improve energy access?

Reflecting France's international climate (compared to 1990) in 2030. Another important planning (Programmation pluriannuelle de l'énergie, PPE) . the security of supply. French Guiana has its own pluriannual energy programming. deployment to improve energy access.

Does French Guiana have a lack of energy?

The lack of access to energy in the inland areas is a key issue at the heart of French Guiana's pluriannual energy programming. With an electrification rate of dwellings four times lower than the regional average ,the energy precariousness,if no further action is taken,should worsen.

How much energy does French Guiana use?

Electricity grid in French Guiana In 2014, the external supply represented around 80% of the total primary energy consumption (235 ktep). Transport and electricity were the most intensive sectors regarding the total primary and final energy consumption (222 ktep) in 2014 .

Does French Guiana have a pluriannual energy program?

As Guadeloupe,Martinique,Reunion and Mayotte,French Guiana has its own pluriannual energy programming. With an objective of energy autonomy set on the 2030 horizon,they have to accelerate the large-scale clean energy deployment to improve energy access.

Does French Guiana have a role in the National Energy Transition?

French Guiana as a French overseas territory can play a fundamental role in the national energy transition. Even though,it is already well positioned regarding the share of renewable energy in the final energy consumption,its dependence on fossil fuels remains a problematic.

How much CO2 does French Guiana produce?

In 2011,CO2 emissions in French Guiana relative to the electricity production was estimated at 360 GCO2/kWh which was four times higher than Metropolitan France (Figure 3). The lack of access to energy in the inland areas is a key issue at the heart of French Guiana's pluriannual energy programming.

French Guiana Business Daily "Think Globally, Read Locally ... To develop Energy-as-a-Service (EaaS) solutions that will speed the adoption of sustainable electricity in November 2021, for instance, Rolls-Royce decided to work with Sustainable Development Capital (SDCL).
