

Does France have a plan for industrial decarbonisation?

In 2020 the French Government adopted the France 2030 plan that directs EUR5.6M of subsidies towards industrial decarbonisation, which complement other financial incentives targeting energy efficiency and low-carbon industrial heat, also supported by ADEME's Heat Fund.

Is a French energy policy localism a risk-and-error transcalar process?

The paper bears witness to the emergence of a French energy policy localism. It presents a sample of significant local rural experiences in the climate energy domain in rural France. These experiences are risky, trial-and-error transcalar processes. They amount to a different way of doing energy policy.

Why is solidarity important in France?

The president of the industrial organization France Industrie, Alexandre Saubot, called for solidarity to safeguard industrial activity and jobs. "Asking individuals and the tertiary sector to make an effort on temperature levels, for example, will cost the economy much less than rationing gas in certain industrial sectors," he said.
