We had an 8 Kw Deye inverter with 14 solar panels and 3 Dyness batteries installed through Greencoin Solar. The installation was exceptionally neatly done and the system has been working perfectly for almost a year now, performing optimally during the load shedding crisis a few months ago. Great service from a very professional team.

My experience with Greencoin Solar was next level. Quality, professional and excellent customer service. I received exactly what I wanted, and the communication updates were on par. Chanel kept me informed all throughout the process.

When sizing your solar panel system, consider these fluctuations in energy production and ensure that your installation meets your energy needs throughout the year. Solar panel sizing also depends on your budget and financial objectives. Larger systems may produce more energy, but they require a higher upfront investment.
