

Energy storage technology provider Fluence and battery gigafactory startup Northvolt will collaborate to develop "next-generation battery technology for grid-scale storage applications," the companies said today. The co-development of grid storage technology will draw on Fluence's long-standing experience in the sector.

An increase in grid-scale battery energy storage capacity more than doubled worldwide in 2023, reaching 55.7 GW and marking a 120.8% increase from the previous year. At this growth rate, the International Energy Agency target of 1,300 GW of capacity needed to meet the 1.5°C global warming goal will be achieved by 2028, two years earlier than ...

The country's first megawatt-scale battery storage system is thought to have been a 1MW/2.3MWh project completed in 2016 using the Tesla Powerpack, Tesla's first iteration of an industrial and grid-scale BESS solution. However the first BESS to be connected to the high-voltage transmission grid in New Zealand came two years after that.

Denmark has been relatively quiet for grid-scale energy storage projects, though an 18MWh thermal energy storage project did start commissioning late last year. Virtual power plant (VPP) companies including Nuvve and Flower are active in the country's ancillary service market primarily through managing EV networks.

A AU\$20.3 million (US\$15.36 million) project to demonstrate the capabilities of utility-scale vanadium flow battery storage in combination with solar PV has been announced in South Australia, with the Federal government helping to fund the project.

"EnerVenue's metal-hydrogen technology is uniquely differentiated from typical li-ion systems. It's ultra-long life, fire safety, and flexibility change the narrative around what's possible with grid-scale battery storage," Randall Selesky said, adding that: "The batteries' 30-year lifespan eliminates the need for augmentation".

The deployment of large-scale battery energy storage systems (BESS) has ramped up in the US since 2021 with annual installations in the multiple gigawatt range since then, culminating in a whopping 7.9GW installed last year. But projects put into operation before then may be more noteworthy to those with an interest in end-of-life solutions and ...

UK Power Networks has revealed the results of a two-year trial on the first 6MW/10MWh grid-scale battery storage project. Free Report Battery energy storage will be the key to energy transition - find out how. The market for battery energy storage is estimated to grow to \$10.84bn in 2026.

Key Capture Energy's KCE NY 1 project in Upstate New York. Image: Key Capture Energy. Update 10

September 2021: A Key Capture Energy representative told Energy-Storage.news that SK E& S anticipates investing a billion US dollars into KCE. The representative said that the money will go towards building the team and developing, constructing and ...

JinkoSolar product development manager for utility-scale storage Neill Parkinson helps us to unravel the complexities of battery storage safety, joined by Jürgen Mollmann of Honeywell Fire, who talks about the ...

Gridstor, a US-based developer and operator of grid-scale battery storage systems, has kicked off construction of its first project in the Texas ERCOT market. The developer said last week (17 October) that construction is underway on the Hidden Lakes Reliability Project 220MW/440MWh standalone battery energy storage system (BESS) in Texas ...

The software has been onboarded at 90MW of Iqony's grid-scale battery energy storage system (BESS) assets across Germany at six projects, each of 15MW power output to the grid. The agreement with Iqony ...

Victoria's energy minister Lily D'Ambrosio (second left) at the Hazelwood BESS inauguration today. Image: ENGIE, Eku Energy, Fluence. A large-scale battery energy storage system (BESS) has been brought online at the site of the former Hazelwood Power Station coal plant in Victoria, Australia.

The state-owned electricity and water company announced last week that the deployment and grid connection of a 1MW / 4MWh Tesla Powerpack battery energy storage system (BESS) had been completed "ahead of schedule and beginning operations to benefit from it during the summer period," during which Qatar's energy demand is at its seasonal ...

Eelpower's platform of large-scale grid connected storage delivers grid stability and balance of supply and demand without which the energy transition cannot happen. By partnering with developers, landowners, manufacturers, contractors, market traders and funders, Eelpower is building the battery infrastructure for the UK to make renewables ...

In 2020, ABB was the largest grid-scale battery manufacturer in the world in terms of revenue, generating over 234 million U.S. dollars from sales in this segment. Samsung SDI ranked second with a ...

The software has been onboarded at 90MW of Iqony's grid-scale battery energy storage system (BESS) assets across Germany at six projects, each of 15MW power output to the grid. The agreement with Iqony was announced today (15 October), although the software has been continuously monitoring the sites since September last year, ACCURE said.

The Aliso Canyon storage procurement did show indeed what energy storage was capable of; setting records for both the fastest grid-scale storage deployment and the world's largest lithium-ion battery facility, and with

...

Japan-headquartered NGK Insulators is the manufacturer of the NAS sodium sulfur battery, used in grid-scale energy storage systems around the world. ESN spoke to Naoki Hirai, Managing Director at NGK Italy S.r.l. ...
s ...

Year in Review 2023: Grid-scale energy storage system integrators Wärtsilä and IHI Terrasun. By Andy Colthorpe. December 26, 2023. ... Battery manufacturers are recognising that storage needs very high cycle life, but not as much power - whereas EVs are the exact opposite. This shows that grid-scale energy storage is coming into its own as ...

Grid-scale battery systems are engineered to augment or replace generation, transmission, and distribution assets across the grid. Large-scale energy storage systems can make the grid ...

Andy Tang (second left) speaking on a panel on resiliency for the US grid shortly after yesterday's interview with ESN. Image: Andy Colthorpe/Solar Media . Would-be battery manufacturers that could serve the US energy storage industry with domestically made cells are facing a "perfect storm", Energy-Storage.news has heard.

We're seeing EV and grid-scale battery R& D paths begin to diverge. Battery manufacturers are recognising that storage needs very high cycle life, but not as much power - whereas EVs are the exact opposite.

Aptech Africa installed 11 solar systems in 11 different villages of 5kWp, 15kWp, and 20kWp with battery energy storage of 12kWh, 15kWh, and 36kWh respectively. One of the systems is a hybrid system and the rest are ...

We provide important information on all the upcoming/announced grid-scale/utility scale energy storage system (ESS) projects in Equatorial Guinea, including project requirements, timelines, ...

Grid Scale Stationary Battery Storage Market growth is projected to reach USD 127.0 Billion, at a 17.56% CAGR by driving industry size, share, top company analysis, segments research, ...

Sherif Abdelrazek, advisory board member at energy storage system modelling software company Storlytics, takes a look at one of the major challenges still faced in the BESS space: how to assess battery lifecycle. Today, the development process for grid-tied battery systems faces many challenges.

The third tranche of the project is the grid-connected BESS pilot, which is going to be the country's first-ever facility of that type. Located near a wind farm and sited at the 220/132kV Jhimpir-1 substation, NTDC is seeking an engineering, procurement and construction (EPC) contractor for the battery plant's installation.
