

Gtf energy Comoros

Which plants use the most energy in the Comoros?

Key consumption and production statistics are shown in Figures 2 and 3. Biomass(wood and charcoal) is used to provide about 70 per cent of energy use in the Comoros. Other plants being explored for generating biomass energy include oilseed plants,such as coconut,sesame,peanut and Jatropha curcas (REEEP,2012).

What is the energy vulnerability of Comoros?

Comoros faces energy vulnerability for three reasons. The first issue is the high cost (0.24EUR/kWh) of carbon-based electricity, which is attributed to a poorly performing distribution network. This leads to more than 40% losses, making it the highest cost in the area.

Why is Comoros energy vulnerable?

Comoros faces energy vulnerability in several ways. The high cost (0.24EUR/kWh) of carbon-based electricityin Comoros is due to a poorly performing distribution network,leading to more than 40% losses.

The year 2020 was a pivotal year in the history of GTF ENERGY due to the idea that originated in the minds of the company owners.
