Image: Pliant Energy Systems. His company, Pliant Energy Systems, has built what looks like a black mechanical stingray. Its soft, rippling fins use hyperbolic geometry to move in a traveling wave ...

Pliant's solution is Velox, which they categorize as an all-in-one AUV/ROV/ASV/UGV platform. This prototype vehicle recently demonstrated the ability not only to swim, but to travel on land, through snow and, perhaps most importantly for polar missions, over ice. Velox manages to do this using a single, unique undulating drive system.

161 likes, 0 comments - glitchnewsupdate on November 27, 2024: "Velox de Pliant Energy Systems es un dispositivo anfibio con una increíble capacidad para moverse tanto en agua como sobre tierra, incluyendo superficies como arena, guijarros, nieve, hielo y terrenos sólidos. Su versatilidad se debe a sus aletas blandas ondulantes, que imitan los movimientos de una ...

Work at Pliant Energy Systems. We are always on the lookout for opportunities to add exceptional skills and/or personality to the team. If you believe we could see you as such an opportunity, feel free to get in touch. We do anticipate new hires in late 2024 or early 2025 - info@pliantenergy

Pliant Energy Systems has created a robot that can both swim in water using fins but also crawl onto land like a millipede. Called Velox, the amphibious robot is capable of traversing sand, snow, ice and other solid substrates and is resistant to ...

The most recent amphibious undulating robot at the time of this writing originated at Pliant Energy Systems, an energy firm based out of Brooklyn, NY. Their robot, Velox, consists of a static, rigid body lined with two sets of dynamically undulating, elongate fins . These fins are based on Pliant's blade-less energy-harvesting

turbines that ...

The unique capabilities of the Velox robot actually stem from research into renewable energy, where CEO of Pliant Energy Systems Pietro Filardo sought to use his knowledge in marine biology to ...
