

How do I expand my home assistant storage?

When you are running Home Assistant Operating System, you can use the following options to expand your storage: Replace your current storage medium, for example, the SD card, with a bigger one. Use a backup to restore Home Assistant from backup on the new SD card.

How do I free up space in my home assistant?

There are several things you can do to free up some space: Follow these steps to check the available free disk space. Go to Settings > System > Storage. Under disk metrics, hover over the status bar to view the details. The Network storage section only shows if you have added network storage. The Home Assistant database can become very large.

How do I store backups outside of home assistant?

Storing backups outside of Home Assistant makes sure they don't use space on Home Assistant to begin with. It also makes sure you can restore Home Assistant from backup in case you have an issue with your current installation. Go to Settings > System > Backups, and from the list of backups, select the backup you want to keep.

Does home assistant support network mounted storage?

As of Home Assistant Core 2023.6, Network Mounted Storage is supported for addons. Keeping the current data is optional, but the data will need to be moved regardless so the share can be created successfully. As of Home Assistant Core 2023.6, Network Mounted Storage is supported for addons.

How do I check if my home assistant has free disk space?

Follow these steps to check the available free disk space. Go to Settings > System > Storage. Under disk metrics, hover over the status bar to view the details. The Network storage section only shows if you have added network storage. The Home Assistant database can become very large. Follow these steps to reduce the size of the database.

How do I backup my Home Assistant VM?

Create a snapshot: Go to your Home Assistant VM in the Proxmox interface, select "Backup" and create a manual snapshot backup. You can select whether only the VM or also the disks should be backed up. Set up automatic backups: Proxmox offers the option of setting up regular automatic backups.

Apparently there are now three frontend modes, storage, auto-gen, and yaml. I seem to be "stuck" in auto-gen mode I have been using HACS for awhile and since I ended up in auto-gen mode I have had this issue that HACS will not automatically add resources when a repo is installed. According to the dev resources will not be automatically added in "auto-gen" ...

Hi there, I went through a guide to install and configure my Home assistant on a Virtual machine on my Synology NAS, and all is working perfectly, but I wanted to have a look and understand if my resources (CPU, storage, etc ...) were still ok, and I have some questions / unclarities ... First, on my Synology Virtual machine, I see this ...

Yes, that section is clear if you are looking to use Network storage, but silent about local storage. Then under "Installation" -> "Home Assistant Addon" section, it says "As of HomeAssistant OS 10.2 and Core 2023.6 defining separate storage for media is supported.", which to me implied that it should be possible since adding another HDD is an example of ...

I've defined a new network storage for backup using Samba to my NAS. How can I check if it's working? So from now on all the backup will be stored on network storage instead of local backup folder? Will this work with ...

I was having the same questions and found useful information here: Long- and short-term statistics | Home Assistant Data Science Portal The website [data.home-assistant.io](https://data.home-assistant.io) was mentioned in the release party for 2021.8. Quote: Long-term statistics are different than the other objects in the database, which are stored exactly as they happened and are ...

tl;dr - Running `du -shc /* | sort -h` from the SSH add-on will show most everything except add-ons. To see add-on sizes, run `docker ps --size` from console or SSH access into HAOS (not the add-on).. Running this from the ...

Regular backups are crucial to protect your configuration, automations and integrations from data loss. This article introduces various backup options for Home Assistant, including the use of network-attached ...

I was hoping someone can help me figure out how I can record footage from a Tapo camera to a storage server on my network. I am using the Tapo control integration and so far it works well. I am now trying to set up an automation that when the camera senses motion it will start recording for 60 seconds. I am however struggling the with the file name (which ...

Why does the disk usage only total ~16GB (~50%), but HA System>Storage indicates I'm using 90%? Because you SSH to the Home Assistant Container, not the OS. To SSH to the host, you need port 22222. [developers.home-assistant.io](https://developers.home-assistant.io)

The Home Assistant installer used the eMMC storage for installation and data but I wanted the M.2 SSD to be used. The Home Assistant hardware overview does not show the M.2 SSD at all Is there a way to verify if ...

No sadly not, it got a little scary .I was worried to create a security weakness in the system to be honest. For all the hassle I am just thinking to buy a second RPi to run OwnCloud and for several reasons including not wanting to overload the system.

# Home assistant storage Mongolia

Hi, I have setup a network disk with proxmox and truenas scale as VM. I have connected it to my windows pc as an extra disk and that is working perfect. On the same proxmox I have a VM with home assistant and that is working perfect. Now I like to connect the network disk in home assistant. If I go to Settings -> system -> storage -> add network storage ... and ...

The above-listed dependencies might differ or missing, depending on your system or personal use of Home Assistant. Create an account . Add an account for Home Assistant Core called homeassistant. Since this account is only for running Home Assistant Core the extra arguments of -rm is added to create a system account and create a home directory. The arguments -G ...

Home Assistant is open source home automation that puts local control and privacy first. Powered by a worldwide community of tinkerers and DIY enthusiasts. Perfect to run on a Raspberry Pi ...

Would like to maybe see an easier option to select "storage" options for the HAOS system and/or it's add-ons. I have been using HAOS since starting with it in late July 2024 when I learned about Frigate NVR. It has been a learning experience using YAML and configuring it all to make it work on my Pi3 B v1.2. Early August I upgraded by purchasing Pi5 8GB, Pi ...

Choose Configuration tab (at the top), mine had 4 balloons above the "ignore pattern" box including .storage which I removed by pressing the x then clicking SAVE at the bottom right. This prompted a restart of the add-on. Following this the .storage folder was visible in my file editor under config/ and I was able to access the files.

HACS ?? Home Assistant Community Store,??? HA ?????,?????????? HA ???,????????????????????? ? github HACS ?????????????????(????? github ...

With 2023.6 now out with NAS support, I felt it was the perfect time to write the Ultimate Home Assistant Backup guide, to compliment the Ultimate Restore Guide I wrote a couple of months ago. This leverages the 3-2-1 strategy. Home Assistant: Ultimate Backup Guide Home Assistant: Ultimate Restore Guide Both use the awesome @sabeechen Google Drive Backup add-on in ...

Home Assistant is open source home automation that puts local control and privacy first. Powered by a worldwide community of tinkerers and DIY enthusiasts. Perfect to run on a Raspberry Pi or a local server. Available for free at home-assistant.io.
