How long do solar panels last?

But, in general, you can expect your solar panels to be a good energy source for a long time, usually around three decades. As solar panels get older, there are a few signs that show they're not as young as they used to be. One big sign is if they're not making as much electricity as before. This can be a slow change that happens over many years.

How long do monocrystalline solar panels last?

However, when it comes to longevity, monocrystalline panels have the upper hand. While both types of panels typically come with a 25-year warranty, monocrystalline panels have a longer lifespan. According to the American Solar Energy Society, monocrystalline solar panels last around 40 years, whilst polycrystalline models last roughly 35 years.

How much do solar panels degrade a year?

The degradation rate of solar panels is calculated as a percentage. Experts estimate that most solar panels degrade at a rate of around 0.2% - 0.5% per year. This means that the output of usable energy generated by your solar panels slowly decreases over time.

Why should you service your solar panels regularly?

Having your solar panels regularly serviced by a reputable professional allows you to discover potential problems early. By doing so, you can take the appropriate measures to fix issues and prevent problems that could cause greater damage to your panels over time.

Do solar panels save money?

While a report from Green Match found that installing solar panels could save the average home up to £1,005 a year in bills, installation and maintenance costs remain the key factors deterring many homes from switching to green energy. But how long do solar panels last?

What is a solar performance warranty?

The performance warranty guarantees that the solar panels will produce a certain percentage of their rated power output over time, usually promising around 80-90% of their original output by the end of the warranty period. These warranties protect your solar investment by making sure the panels work as they should for a long time.
