Are solar panels a good choice for your home?

This means how much sunlight the panels convert into usable energy. As you might imagine, the best solar panels from an efficiency point of view tend to be more expensive. However, they can generate more electricity in a smaller space. For this reason, they're an ideal choice for homes with limited roof space.

What should you consider when buying solar panels?

Efficiency, performance, durability, warranty periods, reputation, and cost are some of the key comparisons homeowners make when buying solar panels. Do your research to narrow down your selection based on your needs and contact a local solar panel installer for expert advice.

Why should you choose a solar panel system?

Sunlight is free, so once you've paid for the initial installation, your electricity costs will be reduced. Solar electricity is low carbon, renewable energy. A typical home solar panel system could save around one tonne of carbon per year, depending on where you live in the UK.

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.

What are the best solar panels?

Our top pick of the best solar panels is the SunPower Maxeon 6AC 445W thanks to its high efficiency, good power output, and excellent warranties. Dr David Sprake, Programme Leader in Renewable Engineering and panel member at the Climate Regional COP Summit, also gave us his advice on choosing solar panels.

Here's a quick list of the equipment you get when you go solar:
