Moving energy made easy - through innovation and sustainability. Tech up, cost down. It's our job. Our mission is the constant development of innovations in e-chains and cables. This enables you to save costs and further increase the quality of machines and systems at the same time, i.e. "Tech up st down" This year, we would also like to introduce innovative energy supply ...

Energy chain system E2i.21: strong, quiet, easily openable, inner height hi: 21.2mm. Cyber Week Deal! 12/2 - 12/7; Get 10% Off a ReBeL Cobot! ... igus inc headquarters is located at 257 Ferris Ave, Rumford, RI 02916. igus enjoyneering center is ...

Energy chain systems. With the energy chain solution, the cables are fed into the e-chain®; at the centre of the travel path. The e-chain® is pushed or pulled halfway along the route. Cable lengths/space requirement. Approx. 50 % less cable (52 m cable length with centre-fixed and approx. 100 m travel) Approx. 800 mm system height

Beyer Maschinenbau GmbH was looking for an energy supply system that provides the stability and durability needed in its machines for the beverage industry. The E4.1L energy supply system from igus meets more than these requirements. Due to its design, it is easy to fill and assemble while being cable-friendly at the same time.

Quick online design of ready-to-connect energy chains. With the igus® energy chain configurator "e-chain® expert", you can assemble your individual ready-to-connect energy chain system in just a few steps. Quick and easy online design Display price, service life and delivery time Share the current processing status

?? ????? energy chains ??? ??. LOXIN decided in favour of the motion plastic specialist igus, which had exactly the right solution in the form of its triflex product range .These hose-like protective cages made of wear-resistant ...

Product range overview for igus® energy chains: small, medium-size, High loads, and For robots, cleanroom, machine tools, rotary and 3D movement, and many more Please choose your delivery location The selection of the country/region ...

All components from a single source - with guarantee Energy chains from igus are already being reliably used in hundreds of thousands of applications all over the world. From beverage machines up to steelworks, from simple linear applications up to the most complicated task - igus offers thousands of installation options.

Polymer energy chains for every movement. Filter according to dimensions, load and dynamic data and get the result quickly. A pre-selection of recommended energy chains makes it easier to find and supply energy in your application. Experts can find a total overview of all igus energy chains on the right.

cradle-chain E2.1.CG drive-chain e-tract cable retraction system E4.1 modular system - slide, roll, save Complete iSet solutions E4Q e-chain®; e-loop for top drives e-spool for theatre Discover everything

Customers can save time and money when using igus® energy chains. igus® energy chains are already being used in a multitude of applications around the world - from beverage dispensers to steelworks. More than 400,000 customers worldwide from 50 ...

The special features of these igus® energy chain ranges are their high stability and quiet running. All systems can be opened on two sides and equipped with various mounting brackets. ...

Reduce production time with igus® harnessed energy chain systems. With igus® readychains®, you increase your factory's productivity and at the same time, improve the quality of your product. igus® takes on responsibility for the entire procurement logistics - from procurement of the necessary special parts, metal sheets or machine parts to ...

The special features of these igus® energy chain ranges are their high stability and quiet running. All systems can be opened on two sides and equipped with various mounting brackets. Unsupported applications, e.g. for spreaders, are as reliable ...

Product range overview for igus® energy chains: it contains more than 100,000 innovative products from stock, extending from the small micro flizz® energy chains through to very large scale energy chains with inner heights of 350 mm.

What is an energy chain? An energy chain (also called energy supply systems, drag chains and cable carriers) are mechanical machine elements used to guide and protect energy, data, signals and fluids together in one system, whilst withstanding the most diverse environmental conditions. Our energy supply systems work best when all elements - cables, hoses, interior separation ...

Product range overview for igus® energy chains: small, medium-size, High loads, and For robots, cleanroom, machine tools, rotary and 3D movement, and many more Please choose your delivery location The selection of the country/region page can influence various factors such as price, shipping options and product availability.

With these 6 best energy chain systems you can implement 90% of all applications. In addition, you can avail of our online energy chains configuration (e-chain expert). After a few entries, you will be shown the ...
