

Infinite power solar New Caledonia

Why is AfD cofinancing the largest solar power plant in New Caledonia?

AfD is cofinancing the largest solar power plant in New Caledonia to allow cleaner energy to be generated. 43,000 photovoltaic panels will be installed, with a capacity to produce electricity for the equivalent of 5,400 households.

Who owns New Caledonia's energy?

The energy produced will be sold via a long-term power purchase agreement to Enercal, a semi-public company majority owned by New Caledonia. A similar (but smaller) project has also been financed at the same time in Temala in the North Province. It is the first photovoltaic power plant on customary land.

What is New Caledonia's largest solar power plant?

The project involves building and operating a solar power plant with a capacity of 11.2 MWc in the South Province, in Boulouparis. The power plant, which is the largest existing solar facility in New Caledonia, comprises 43,000 panels covering 20 hectares. It was commissioned at the end of April 2017.

Where can infinite power cells be installed?

Infinite Power Cells can be safely transported to any location and quickly installed into power generation facilities, where they can immediately begin feeding green power to customers. We supply green power to organizations and institutions that are large consumers of electricity, eliminating the costs of transmission and grid distribution.

How much power can infinite power cells produce?

Infinite Power Cells can exceed 1000 MW of installed power, equivalent to that of a large power station, and our installations are already providing dedicated, reliable green power to high-value commercial clients, hospitals, and producers of green hydrogen. Are Infinite Power Cells patented?
