

Install photovoltaic panels on the roof of a rented building

Do you need planning permission to install solar panels on your roof?

An increasing number of people are investing in solar energy. More and more homes are having solar panels, or solar tiles, installed on their roofs. Of course, with such installations, the topic of planning permission and building regulations often comes to the surface.

Can you install solar panels on a flat roof?

You can install solar panels on a flat roof, but it's much easier on the flat roofs of large, commercial buildings, which are typically very strong. The vast majority of residential flat roofs in the UK are not suitable for solar panels, due to a variety of reasons.

How to install solar panels?

Make space for the solar panel accessories (solar inverter, cables and solar batteries, if desired), for instance in a plant room 4. Plan a day for installation 5. Erect the scaffolding (this can be done by your supplier or by a company you organise) 6. The solar panel mounts will be installed 7. The professionals will install the solar panels 8.

What is a solar panel rent-a-roof scheme?

The Rent-a-Roof scheme lets people who can't otherwise afford solar panels gain access to them, through installers who will setup solar panels on roofs for reduced prices. Installers can then sell any excess electricity generated back to the grid.

Where should solar panels be installed on a roof?

The best place to install solar panels on a roof (flat or sloped) is on a south-facing section, as it will receive the most daylight throughout the day, optimising electricity production.

Can solar panels be installed on a block of flats?

You can technically install solar panels on the wall of a block of flats, or even on the ground next to the wall. However, we usually recommend placing your solar panels on a south-facing roof, at an angle of between 20 and 50 degrees. Your panels will then be exposed to more sunlight, which will generate more electricity for you.

The Rent-a-Roof scheme lets people who can't otherwise afford solar panels gain access to them, through installers who will setup solar panels on roofs for reduced prices. Installers can then sell any excess electricity ...
