to the deployment of renewable energy, particularly solar energy. Burkina Faso benefits from daily sunlight of 5.5 KWh/m<sup>2</sup> for 3000 to 3500 hours per year, with a uniformly distributed solar resource across the national territory, yielding an average of 1620 KWc. This growth in renewable energy has been facilitated by state subsidies on imported

Background PV/diesel microgrids are getting more popular in rural areas of sub-Saharan Africa, where the national grid is often unavailable. Most of the time, for economic purposes, these hybrid PV/diesel power plants in rural areas do not include any storage system. This is the case in the Bilgo village in Burkina Faso, where a PV/diesel microgrid without any ...
