That's because they contain over 30 years of robotic experience. As early as 1980, the KUKA Project department created the first customized energy supply solutions. Six years later, these were followed by the first standard portfolio. With extensive improvements and technical innovations, KUKA continued to extend its developmental lead.

Where do you get airflow on a KUKA?

Checking out the other side of the Kuka, you'll notice you get airflow from two areas. You receive airflow from both the Boroat the bottom of the tank and also from the side of the device. You'll also find a nice shiny "Kuka" sticker and Veepon logo there too .

Is the KUKA aio a simple design?

Onto The Main Event, The Kuka! Of course on top of all of the above on the box you also get the main device itself, The Kuka AIO! Although yes, it's a simple design, I quite like the simple yet clean finish. It has nice clicky fire button, some airflow holes just on the side of the device with the USB C port being situated just below.

There is a LOT to dig into. Inside the box of the pro version, you will get a user manual, Four battery wraps, two different coils (a 0.60 as well as a 0.30), Spare O rings, A fair selection airflow pins for the included RBA, A stock ...
